

The old rope lock used together with the Redcord Axis has been replaced due to safety reason and shall not be used.

This is the new rope lock to be used together with Redcord Axis

Front side

Back side

## How to use the new Redcord Rope Lock:

Place the rope inside the lower part of the cleat

Place the rope inside the upper part of the cleat. Grip the cleat with one hand and make sure that the cleat is attached proper to the rope

Attached the carabiner to the cleat

Then attached the strap to the carabiner

The new rope lock/cleat is ready to us
